

Knowledge Base Corpus Classification - Northstar Assist

Tarie Nosworthy

18 September 2026

Contents

Classification summary	1
Detections by rule	1
Per-document detail	2

Documents scanned: **30**

Scanner: `submission/scripts/scan_corpus.py` (deterministic regex rules, no model calls)

Every document below is retrievable by the agent through the gateway’s `Retrieve` tool. Retrieved chunks are placed directly into the model’s context window **without passing through the input guardrail**, so the classification here defines the blast radius of a successful retrieval.

Classification summary

Tier	Documents
RESTRICTED	1
CONFIDENTIAL	12
INTERNAL	17

Detections by rule

Rule	Occurrences
<code>employee_id</code>	64
<code>internal_email</code>	44
<code>customer_id</code>	33
<code>external_email</code>	30
<code>ticket_id</code>	18
<code>opportunity_id</code>	15
<code>us_phone</code>	7
<code>ec2_instance_id</code>	6
<code>aws_account_id</code>	3
<code>password_literal</code>	2
<code>api_bearer_token</code>	1
<code>generic_bearer</code>	1

Per-document detail

Document	Format	Tier	Detections
csv/aws_infrastructure_inventory.csv	csv	CONFIDENTIAL	ec2_instance_id x6 - cols: monthly_cost
csv/ customer_accounts.csv	csv	CONFIDENTIAL	external_email x15, customer_id x15 - cols: monthly_revenue
csv/ employee_directory.csv	csv	CONFIDENTIAL	internal_email x25, employee_id x41
csv/sales_pipeline.csv	csv	CONFIDENTIAL	external_email x15, opportunity_id x15 - cols: deal_size, probability
csv/support_tickets.csv	csv	INTERNAL	customer_id x18, ticket_id x18
